

Spad VII Bi-Plane

This WW I Bi-plane fighter is made primarily of yellow heart wood. Plans, dimensioned CAD drawings, photos and detailed instructions are included to build this wooden toy plane.

The prototype, named SPAD V, used a single-bay biplane wing with central section struts, SPAD VII at the National Museum of the United States Air Force. The SPAD (S.13) was a further development of the successful SPAD S.VII (S.7) design, the latter eventually becoming outclassed by the newer and better This page details the development and operational history of the SPAD Single-Engine Biplane Fighter Aircraft including technical specifications and Download this stock image: A 1917 Spad VII biplane in flight. - AGWNEJ from Alamys library of millions of high resolution stock photos, illustrations and vectors.
